MPS Contracts Awarded

Hydrotech has great pleasure in announcing that over the past two weeks it has secured three MPS projects.

Of most interest to investors is the long awaited confirmation from Enterprise plc in the UK that they have secured a project from Metronet to install our MPS System at Great Portland Street Underground Station. This project is a follow on to the highly successful installation of the MPS System at Walthamstow Underground Station. However having subsequently gone into administration, Metronet has over the past 4 years completely reorganised their structure. Nevertheless, during this period Hydrotech has maintained contract with key personnel within the Metronet Group and award of the project at Great Portland Street is, to some extent, a result of these relationships. This potentially milestone or pivotal project will commence in January 2011.

In Hong Kong, the New World Group has instructed their subsidiary Hip Hong Construction Company to enter into an Agreement with Hydrotech to install the MPS System into a residential project presently under construction. The New World Group is one of the largest conglomerates in Hong Kong with a diverse produce portfolio including several high end residential and commercial developments. This project is a pilot project for the New World Group and if successful, the MPS System will be incorporated into their standard specification for waterproofing of basement structures.

We can also confirm that a small project has been awarded to one of Hydrotech's business partners in Hong Kong to install the MPS system into the China Light and Power (CLP) Fan Room located at Harbour City, a prestigious retail outlet. China Light and Power supply power services to over 80% of Hong Kong's population

We are continuing to promote the MPS System to several key clients within Hong Kong and China and are hopeful that there will be further announcements within the next 4 to 6 weeks.

Yours sincerely
