MPS Contract confirmed for Pinghu Villas, Yangtze River Delta, China

The Company is pleased to announce a contract has been signed by Hydrotech China for the MPS System to be installed at the Pinghu Villas project in Eastern China, the fastest growing economic region in the Peoples Republic of China.

Pinghu Villas is a large walled residential development ready for immediate commencement of construction. The project is located in the Yangtze River Delta, where water ingress issues in underground facilities have been a major technical difficulty for developers in the past. Although the contract value of this initial project is relatively small (\$20,932 AUD), it is expected that the successful installation and proven efficacy of the MPS System at the Pinghu project will demonstrate the effectiveness of the system to overcome the water ingress issues historically plaguing this vast area, and that this will in return lead to further projects in this region.
